JOURNAL OF APPLIED GEOPHYSICS

Contents Volume 41, 1999

A new procedure for the interpretation of VES data: 1.5-D simultaneous inversion method
Á. Gyulai and T. Ormos 1
Remigration of ground-penetrating radar data
M.S. Jaya, M.A. Botelho, P. Hubral and G. Liebhardt 19
Three-dimensional inversion of induced polarization data from simulated waste
A. Weller, W. Frangos and M. Seichter 31
A modeling solution for predicting (a) dry rock bulk modulus, rigidity modulus and (b) seismic velocities and reflection coefficients in porous, fluid-filled rocks with applications to laboratory rock samples and well logs
A.K. Benson and J. Wu 49
Quaternary deformation mapping with ground penetrating radar
J.P. Busby and J.W. Merritt 75
Effects of transverse electric anisotropy on self-potential anomalies
G.Ai. Skianis and M.C. Hernández 93
Geophysical imaging of a kaolinite deposit at Sylvan, Manitoba, Canada
I.J. Ferguson, J.P. Ristau, V.G. Maris and I. Hosain 105
The modelling of direct current electric potential in an arbitrarily anisotropic half-space containing a conductive 3-D body by Ping Li and Norm F. Uren. [J. of Appl. Geophys. 38 (1997) 57–76]
I.V. Lindell and M. Flykt 131
The modelling of direct current electric potential in an arbitrarily anisotropic half-space containing a conductive 3-D body
P. Li and N.F. Uren 133

Special Issue
Electric, Magnetic and Electromagnetic Methods Applied to Cultural Heritage
First International Workshop on Electric, Magnetic and Electromagnetic Methods Applied to Cultural Heritage, Ostuni, Italy, September 29–October 1, 1997
edited by
D. PATELLA and A. HESSE

Preface 135
Remanent magnetization of mural paintings from the *Bibliotheca Apostolica* (Vatican, Rome)
G. Chiari and R. Lanza. 137
Micromagnetic investigations of medieval settlement structures at Kalø castle (Denmark)
U. Koppelt, N. Abrahamsen, G. Dittrich, J. Frandsen and Ph. de Lasson 145
Multi-parametric survey for archaeology: how and why, or how and why not?
A. Hesse 157
Geophysical investigations of the Olonium Roman site (Northern Como Lake)
E. Arlsan, G. Biella, G. Boniolo, D. Caporusso, R. de Franco, A. Lozej and L. Veronese 169
Acquisition and processing of electric, magnetic and GPR data on a Roman site (*Victimulae*, Salussola, Biella)
L. Sambuelli, L.V. Socco and L. Brecciaroli 189
Some case studies of geophysical exploration of archaeological sites in Yugoslavia
S. Komatina and Z. Timotijevic 205
Focused imaging of electrical resistivity data in archaeological prospecting
A. Kampke 215
Seismic response in archaeological areas: the case-histories of Rome
S. Donati, R. Funiciello and A. Rovelli 229
The geophysical contribution to the safeguard of historical sites in active volcanic areas. The Vesuvius case-history
D. Patella and P. Mauriello 241
Radar tomography for NDT: comparison of techniques
S. Valle, L. Zanzi and F. Rocca 259
2-D and 3-D processing and interpretation of multi-fold ground penetrating radar data: a case history from an archaeological site
M. Pipan, L. Baradello, E. Forte, A. Prizzon and I. Finetti 271

GPR prospection in ancient Ephesos
J. Hruska and G. Fuchs 293
The location of infinite electrodes in pole–pole electrical surveys: consequences for 2D imaging
H. Robain, Y. Albouy, M. Dabas, M. Descloitres, C. Camerlynck, P. Mechler and A. Tabbagh 313
Electrical imaging of lateritic weathering mantles over granitic and metamorphic basement of eastern Senegal, West Africa
M. Ritz, J.-C. Parisot, S. Diouf, A. Beauvais, F. Dione and M. Niang 335
A versatile integral equation technique for magnetic modelling
P. Furness 345
Electrical imaging of an alluvial aquifer at the Antinaco-Los Colorados tectonic valley in the Sierras Pampeanas, Argentina
A. Osella, A. Favetto, P. Martinelli and D. Cernadas 359
Acknowledgement to referees, 1998 369
